

Student International Health Insurance

Private health insurance for international students studying abroad

Studying abroad is one of the most exciting experiences of your life. New places, new people, new challenges — the last thing you need is your health getting in the way.

The Student International Health Insurance plan from APRIL International is designed for students aged 18–40 living or studying outside their home country. It gives you fast access to quality healthcare wherever you are, depending on your chosen area of cover, so you can focus on making the most of your time abroad.

Why health cover matters when you study abroad

The costs can really add up Medical treatment abroad can be expensive. One student’s knee surgery in Austria came to over €21,300. Even a simple tonsillitis consultation in the UK can cost £392. Without cover, that bill is yours.	It may be a requirement Many universities and countries require proof of valid health insurance before you can enrol or enter. Our plan meets those requirements, so you’re covered from day one.	Stay focused on your studies With the right cover in place, you can see a doctor quickly, get treated privately, and get back to your academic life with as little disruption as possible.
